### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the prior art of record does not disclose or suggest a process for converting naphtha to light olefins and aromatics as claimed in which the catalyst comprises the claimed combination of components wherein the catalyst has an initial silica/alumina molar ratio between about 5 and about 30. The Drake reference is silent regarding this ratio and, because of the unpredictability of catalysts, there is no expectation of success in using the zeolite of the EP 323736 reference in the promoted catalyst of Drake.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*
